# *Satellite Home Cable TV*

## **MORE FUN... LESS MONEY**

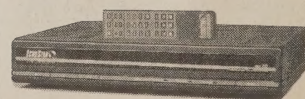

Consider, for just one evening out, a family of four will spend well over \$30. **Why Not Stay At Home?..** with your own small-dish Home Cable TV system where virtually every type of entertainment option is available for you to view, hear, and enjoy right in your own living room-- with quality that you could only have dreamed of in the past. There are up to 200 channels of movies, news, sports and specials... plus digital stereo sound... the ultimate entertainment system that every home can have... **NOW!**

More FUN, More VALUE! More and more people are turning their living rooms into private theaters these days by simply adding a new small-dish satellite TV system to their TV sets... and why not? When com-

pared to most other forms of family entertainment, Home Cable TV offers unbeatable fun... **ANY NIGHT!** And now with new package pricing, total financing and low monthly payments, this great entertainment medium just got a whole lot more affordable.

With your own small-dish Home Cable TV system, the show starts when you're ready, the chairs are comfortable, and the popcorn is always hot. And the price just can't be beat... less than \$1 per day for our **BASIC Home Cable TV System.**

Imagine for a moment: From your easy chair, you're able to direct your new Home Cable TV antenna to more than 30 satellites parked in stationary orbit some 22,300 miles above the equator. You freely choose from hundreds of stations of interest to you, including dozens of movies, sports, children's and news service channels. You watch a crystal-clear picture and hear the finest, state-of-the-art digital stereo sound. This is TV as it can be... for you, today, for as little as \$39 per month (o.a.c.).

Ask any satellite dish owner about the high quality entertainment he has access to 24 hours a day, every day!

You can join the over 3.5 million American families who now own a satellite Home Cable TV system. These families have discovered that they can receive over 200 TV channels... TV channels which not only entertain, but also inform and educate. And, like these 3.5 million people, with your new smaller-dish Home Cable TV system you'll see the latest news events as they happen, as well as the very newest blockbuster movies and music video events. You can also receive many sporting events direct from the stadiums, financial, weather and agricultural shows, as well as 75 radio stations that carry many listening choices. In fact, the number of shows beamed down to you is over 40,000 each month... and no, that's not too many. It just means that chances are you'll find exactly the entertainment you're looking for anytime you want it. Home Cable TV gives you MORE!

And it's waiting for you **RIGHT NOW!**

**MORE MOVIES** - Whether you're partial to first run movies, foreign films or Hollywood classics, Home Cable TV is THE ticket to the finest films available - uncut and uninterrupted. Depending on who you ask, and when you count, there are more than 2000 movies and live concerts available to the satellite TV owner every month, most in Dolby Pro-Logic digital surround sound. Even the newest movies are available via the many Pay-Per-View services, including those for "adults only".

**MORE SPORTS** -

Every sports fan has wished for a

# More Choice... MORE VALUE

satellite system at some time during his favorite sporting season, and for good reason. Only satellite TV can deliver the sheer quantity of sporting action needed to satisfy sports fans from every sport, and from coast to coast. Your new satellite system is like having a front row season's pass to year-round, non-stop professional and collegiate teams from Football, Baseball, and Basketball to Hockey and Soccer.

**ALL THE GAMES** - As a Home Cable TV system owner, you'll be especially pleased. Because of superstations like Home Sports Entertainment, Madison Square Garden Network, and Prime Ticket, there are more sports floating around the skies than you can imagine. Boxing, tennis, horse racing, track and field, auto & motorcycle racing, surfing, skiing, swimming, and golf are all available on all of the regional sports networks. If you're interested in sporting action, you'll find a constant source of thrills and excitement as you witness a virtually endless sports season!

**MORE NEWS** - Catch the latest news whenever you want it. These days when events from around the world and here at home have so much effect on our way of life, only Home Cable TV owners are able to watch the real stories as they happen. No longer is it necessary to wait for your local evening news to tell you only of the event's highlights.

You get to see the news first-hand... reports that tell it all... and you get to see them anytime you like!

**MORE SHOWS!** -

Home Cable TV offers special entertainment programming that just isn't available on broadcast TV or regular cable TV. From rock concerts and comedy specials to Broadway shows, a spectacular array of world-class performances are available to

you on Home Cable TV most any evening.

**MORE SPECIALS** - Armed with a credit card, a telephone, and your Home Cable TV system, you can tour all of the satellite shopping malls and shop to your heart's content. A big plus if you live where going on a shopping trip is an all day affair. With satellites placed in the heavens, religious programmers offer 24 hours of spiritual guidance from nearly every denomination, and you're bound to find a program that's an inspiration to you.

**MUSIC, MUSIC, MUSIC!** - Music videos are especially popular because of the superb digital stereo sound that comes

with the hi-fi pictures.

**MTV, VH-1, MOR Music and Much Music** offer rock to popular easy-dancing, and **The Nashville Network** and **The Country Music Channel** suit everybody

including country music fans. Home Cable TV is for you.

**MORE CHILDREN'S SHOWS!** - Channels like **The Disney Channel**, **Nickelodeon**, and **The Family Channel** open up an entirely new world to children. With your Home Cable TV system, there are literally hours of daily stimulating programming that's healthy as well as entertaining for a child's inquiring mind. **In fact, with so much out there to watch, your new Home Cable TV system may be the best investment that you can make for your family this decade.**

**SATELLITE TV MAKES A HOME THEATER**

# HOW TO TURN YOUR HOME INTO A THEATER

The new RCA Home Theatre™ Stereo/Monitors are designed for

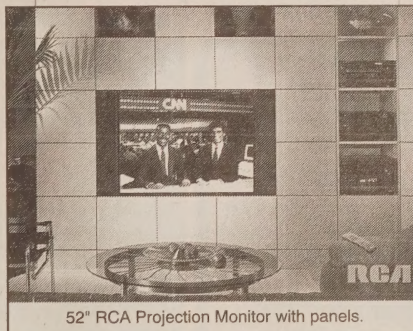

52" RCA Projection Monitor TV  
The Wide-Screen most in demand, now on sale at NBO  
only **\$2479** or **\$62** per month (o.a.c.) (P52152ST) and includes FREE Shipping!

Satellite TV... with many new advanced features that will change the way you watch TV. Imagine digital stereo surround sound... the same as in a movie theater... in your own home! Teamed up with your new top-of-the-line EchoStar Home Theater Home Cable TV system, the experience is amazing! You get a super clear picture that's remarkably bright with color picture-in-picture capability (with second tuner or VCR). There's a huge selection of block-

buster movies and special events on satellite at your fingertips and everything is controlled from your favorite chair.

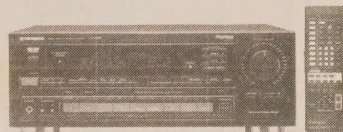

You can have a Home Theater without the cost of breaking down walls and adding an entertainment room. In fact, you can have the satellite portion for as little as \$39 per month (o.a.c.). That's the whole idea behind NBO's Home Theater Systems.

It all starts with a high resolution video source like the DELUXE or Top-Of-The-Line EchoStar Home Cable TV system. Next, is a selection of large screen sizes (27" to 60") (page 29) in a variety of designs and styles to enhance any room. A Pro-Logic A/V receiver and optional speakers for surround sound can also be added. Hooking it up is as

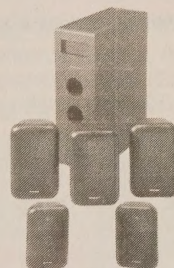

52" RCA Projection Monitor with panels.

easy as tying your shoe, and with NBO's help you'll quickly be tuning in all the satellites and enjoying entertainment (Home Theater) like never before.

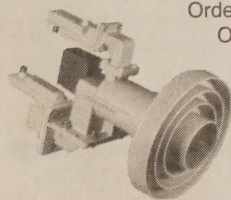

Pioneer 511S A/V Receiver  
NBO's choice for a feature-packed quality Pro-Logic surround receiver.  
NBO's price **\$448** or **\$15** per month (o.a.c.) and includes FREE Shipping!

Pioneer V401 Speaker System  
The ultimate speaker system for achieving extraordinary Pro-Logic surround sound. Available in white or black. NBO Discount **\$798** or **\$20** per month (o.a.c.)

As an NBO customer, you can add programming to your account any time, and still receive great savings. You don't have to order all services at the same time. Each time you place an order, you will receive the price for the service you're buying based on the total services you have already ordered.

Many people don't realize that their Home Cable TV systems are also capable of receiving satellite radio services. In fact, there are almost 100 such radio broadcast channels available, with 15 services on satellite G-5 alone. You can receive these stations simply by changing the channel to the service you want and using the audio tuning function on your IRD. With top-of-the-line IRDs, tuning in the radio services is automatic.

# 'Everything Else Package'

It's everything you need to make a complete system... simply buy the IRD of your choice.

Save over \$100! Get  
EVERYTHING for only

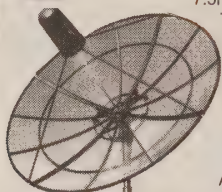

## \$675

Feed

LNB

7.5ft. Kaul-  
Tronics  
Antenna

Actuator

ProArc™

100ft. Cable

Tools

an antenna without one! And of course, **Toll-Free Help** is always available to NBO customers.

**Miscellaneous Special tools and parts** and **Installation Booklet** are included so that you've got everything on-site during your installation to complete the job... that's why we can call this package the 'Everything Else' package.

**The Antenna** performs like a parabolic "microwave mirror". It must have a highly accurate curve to focus *all* the faint energy from space into a precise area known as the focal point. From experience, NBO knows the antennas it recommends here work best.

**The Feed and LNB** are generally considered the most trouble-free parts of your system. They process the focused energy at the focal point by amplifying it and sending it via a coax cable into the IRD inside the house.

**The Actuator** is responsible for moving the antenna to precisely the right position for best reception of the satellite signals. It suffers the most wear and tear of any system part and therefore must be of the highest quality.

**The Satellite Cable** carries the focused and processed satellite signal from the antenna into the house for the IRD. Most often, this cable is buried, and any problem here would be a major one indeed. NBO provides only the highest quality cable available.

**The ProArc™** alignment tool is essential in aligning your antenna after it's first installed. It is calibrated to your exact location so that all you need do is place its magnetic base on the backside of the antenna and adjust the antenna's elevation control to the ProArc's settings. This little device has saved customers many hours of randomly pointing the dish in hopes of picking up signals. The ProArc is an NBO exclusive product. Don't try to install

## Planning your Dish Location

Your NBO purchase is backed by over 10 years of satellite TV experience and customer service.

All the domestic satellites we use to access over 200 channels of television are located above the equator in a stationary orbit. It's easy to aim your antenna and watch any one of them... just keep these points in mind when planning where to install your dish:

The antenna points south toward the equator and, if you live near the center of the U.S., it swings on its mount in an arc from southeast to southwest. (If you live on the eastern side of the country, your antenna will point from south to southwest; and in the western regions, from slightly southwest to southeast.)

It must have a clear view of each satellite. Any obstruction to its vision will result in a weakened signal and poor pictures. The antenna can't see through trees or a house... but it can look over them.

If you have any questions about locating your dish, call NBO. Experienced phone help is always available during your planning stage and during installation and for as long as you own your system. Most of our customers save hundreds of dollars by doing their own installations because it's so easy with the full, clear instructions you get. However, if needed, professional installation is always available. Give us a call.

# GENERAL INSTRUMENT

**The Innovation Series™**  
Home Entertainment Receivers  
Continuing the tradition of innovation and reliability

Model 450i

## Innovation Model 450i

**\$1049**  
Low  
As **\$26** Per  
Month  
(o.a.c.)

Innovation 450i is equipped with a standard I/R remote. To upgrade to the ANYWHERE® UHF remote add \$89. Include the convenient FlashCard™ remote for only \$29.

Combining the latest technology and most popular features with an affordable price, the Innovation 450i from General Instrument delivers crystal clear reception and compact disc quality audio. Incorporating the satellite receiver, antenna positioner and power supply into a sleek, fully integrated unit, the Innovation 450i outperforms IRDs costing much more. Truly one of your best values in home satellite receivers today. See the chart below for features.

All Innovation series receivers have an impressively LOW 6.5db static threshold performance... great for small dish installations. And, combined with their new bandpass filter design and terrestrial interference filters, the Innovation series receivers produce superior pictures on any size dish. Every Innovation receiver features optional FlashCard Remote.

*"...having owned satellite receivers in the past I was particularly thrilled with the ease of function and superb picture quality on my new G.I. IRD. Bravo General Instrument!"*  
Mr. E.V.P. Camarillo, CA

# TOSHIBA

## Home Satellite Theater

The new Toshiba TRX 1500 is the ideal IRD for the custom home theater installation. Using direct audio/video output only (no channel 3 or 4 modulated output), it plugs right into your monitor TV, and even offers S-video capabilities. You'll appreciate the convenience of its UHF and I/R remote that operates from any room in the house, as well as its great on-screen menu for favorite channel selections. And it's as easy as can be to program. With signal seeking auto peak you'll be able to fine tune in the satellites fast. The TRX 1500 has most of the same features as Toshiba's top-of-the-line model but at a much lower price, and when compared to most other makes, it's great value *really* stands out. Buy with confidence knowing you're getting the highest quality and proven Toshiba reliability.

### Toshiba TRX 1500

Toshiba offers three great models in its line-up. The top-of-the-line TRX 2200 has the amazing "Image Magic" display using LCD animation to keep your system orientation accessible at a glance. While the TRX 1800 communicates through a bold combination of fluorescent tubing and sharp scarlet LED indicators showing satellite name and channel number in crisp digital characters. All Toshiba models are backed by a factory warranty for two full years.

## Famous *TRACKERS*

**TRACKER 10 Plus+**  
Features **MTS Stereo!**

Quality, performance and reliability from one of the largest manufacturers of home satellite receivers and IRDs, continues to be the hallmark for HTS. The Tracker 10+, for example, features an on-board MTS encoder that surpasses the standard. No noise, no distortion, just crisp, clear hi-fidelity stereo to complement the system's unsurpassed video quality. And with the Tracker 10+ MAX remote control that transmits both UHF and I/R, you can control not only the satellite receiver, but also your TV set and other I/R equipment. Tracker 10+ has a lot more making it a truly remarkable satellite receiver.

control on this remote is right where your thumb lands - every time. And right next to the volume is the channel up/down button... the two controls folks use most... no longer a need to turn a bright light on when you want to change channels. And because the remote is a UHF control, it works all the way from the bedroom, or any room in the house.

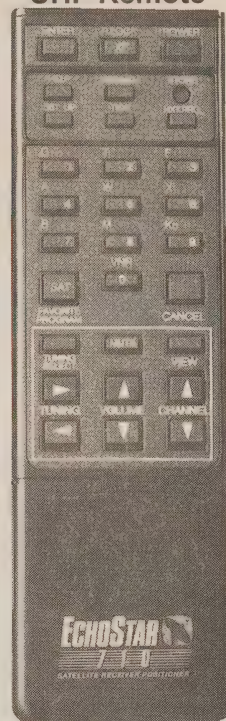

There are many other top features in the EchoStar 710 IRD, like detailed on-screen displays that make using the system easy for everyone in the family, and A/V switching so you can switch between satellite, VCR, laserdisc or any other second external source. It has a built-in event timer for use with your VCR to record programs while you're away, stereo balance control, 200 favorite channels, auto-tune and more.

When you purchase the EchoStar 710 IRD you're buying the top-of-the-line.

EchoStar's satellite receiver line-up has a model just right for you. Each one produces the clearest pictures and the best digital sounds possible. Advanced, yet reliable and simple to operate. And every model offers you the pleasure of detailed on-screen displays to guide you through every step. Pride of ownership comes with an EchoStar IRD.

### dB50 Personal Listening System

The dB50 Personal Listening System is a stereo FM assistive listening device designed for use by persons with mild to severe hearing loss.

The system uses Chaparral's unique separate left/right ear volume and tone adjustments. 150ft. range. System includes stereo transmitter, compact receiver w/ rechargeable battery, two styles of lightweight headsets, microphone and cables for connection to TV, VCR, CD player or stereo system.

NBO Price **\$199**

## VC-RS Descrambler

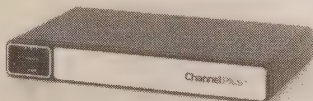

VideoCipher Renewable Security descrambler module plugs right into your IRD. Includes built-in VideoPal pay-per-view order recorder. Discount programming packages available with order. Call for current specials.

## VIDEOPATH \$149

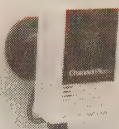

VideoPath transmits the audio/video signals from your IRD to any TV in another room without wires. Two-piece set.

## CHANNEL PLUS MODULATOR \$239

Channel Plus from Multiplex Technologies adds satellite receiver and VCR to your cable TV service on unused channels. Or, put your satellite and VCR and local antenna all on a single cable. It works by creating new channels on your existing house cable so now you can watch everything in different rooms. Call for information on other models for other applications.

## CHANNEL PLUS CAMERA \$359

Add to Channel Plus Modulator to monitor a specific area of your home.

With the camera you can watch the "front gate" simply by switching to that channel on your house cable distribution system. Complete with cables.

## UHF REMOTE CONTROL \$59

The POWERMID set converts your infrared remote control to UHF, enabling you to control your IRD (or VCR or Cable Box) from the bedroom or anywhere you like.

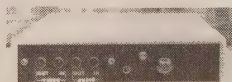

## PHONEJAK \$69

PHONEJAK includes base unit + 1 extension. Use it to provide a phone outlet behind your IRD for hookup to satellite pay-per-view. Easy to install, just plug phone line into base unit and plug extension unit into an AC outlet anywhere you want a phone jack. Extra extensions \$39 ea.

## TELETEXT DECODER \$259

ASTROTEXT Decoder gives you over 150 pages of text news, sports scores and

tons of information right on your TV screen 24 hrs/day. Plugs into your VCR or IRD that's receiving Superstation TBS. NO subscription required.

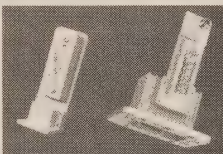

## SCPC RECEIVER \$429

Single-Channel-Per-Carrier receiver, when hooked up to your satellite dish, allows the reception of all the hidden radio signals on satellite. Sports fans love it for all the games they can now receive. Monaural sound only. Digital tuning.

## C & Ku-Band LNBs Low as \$109

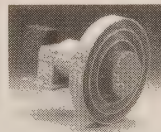

Located at the focal point of your dish, new H E M T technology

provides purest pictures especially on small-dish systems. Ku-Band 1.0db \$109, Ku-Band 0.8db \$159, Ku-Band 0.7db \$179, C-Band 30° \$129, C-Band 25° \$179. A two-year warranty protects every model.

## C-BAND FEEDHORN \$59

CHAPARRAL Polarator, located

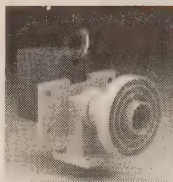

at the focal point of your dish, feeds the focused C-Band only signals into your LNB.

"Service Is Our Specialty" means FAST NBO Delivery.  
Call to order: 1-800-346-6466

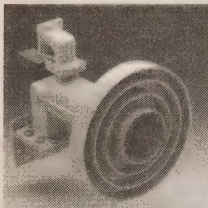

## KU-BAND FEEDHORN \$49

CHAPARRAL Ku Mini-Rotor used on a dedicated Ku-Band antenna feeds focused signals into the Ku-band LNB.

## DUAL-BAND FEED

**\$109**

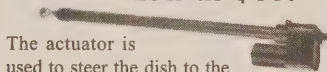

CHAPARRAL Corotor automatically separates the C & Ku-Band signals at the focal point of the dish and feeds

each to their respective LNBs. Use with any antenna to upgrade your system to Ku-Band operation. Easy installation.

## ACTUATORS

**Low as \$89.**

The actuator is used to steer the dish to the desired satellite. It requires only 4 low-voltage wires to operate and is controlled by your IRD. Standard 18" stroke \$89, Heavy Duty 18" stroke \$139, Heavy Duty 24" stroke \$179.

## WEATHERIZING KIT \$29

Protect your actuator from the elements with a motor cover and actuator boot weatherizing kit.

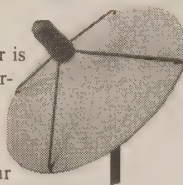

## FEED COVER \$19

Most antennas come with one, but if your system is without a Feed Cover, buy this one! One size fits all antennas and protects your delicate electronics for years.

## CLEARSAT COVER \$149

Clearsat dish cover is completely transparent to satellite signals and keeps snow build-up from pulling your dish out of alignment.

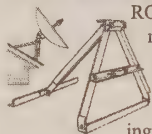

## ProArc™ TOOL \$39

The ProArc alignment tool is for use on any newly installed dish to help align it to the arc.

Each one is shipped fully assembled and calibrated to your exact location so all you have to do is place its magnetic base on the rear of your dish and adjust the elevation and polar axis until the bubble levels are centered and your signal is strongest. Includes complete instructions.

## ROOF MOUNT from \$159

ROHN Roof Mounts are made for satellite dish applications and are shipped with hardware kit for mounting to any roof.

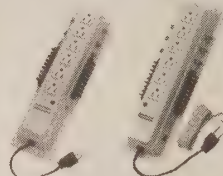

## LIGHTNING SURGE PROTECTOR \$129

Using the same technology as the phone companies, you can protect your entire satellite system from damage by lightning by installing this multi-stage gas-tube lightning arrestor at the dish (installation takes about 30 minutes). Now when lightning strikes nearby, you won't get any surge

indoors via your dish wires. Use with AC surge protector indoors (included) for complete protection.

## SATT-MASTER SURGE PROTECTOR \$189

Satellite receiver protection with the model SFK-III-36 covers not only your dish wires,

but the AC power cords and all your coax cables as well. Easy installation. Use the PPV model for additional protection of your phone line - \$219.

## SATELLITE Cable \$.69/ft. RG-6 Coax Cable \$.13/ft.

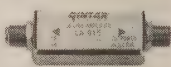

Highest quality satellite cable prevents signal loss and sparklie

pictures. Contains all wires necessary to operate dish electronics, including extra coax for Ku-Band LNB.

## BULLET AMP \$29

This in-line amplifier is used between the dish and the IRD to make up for signal loss on cable runs over 250ft.

## CABLE AMP \$27

Once you split your satellite or VCR cable to your TV set for a long run to upstairs, you'll need to boost the signal with this amplifier.

**EVERYTHING IS ALWAYS IN STOCK AT NBO**  
**Call to order: 1-800-346-6466**

## CHANNEL COMBINER

**\$16**

Using this combiner you can add satellite or VCR pictures to your existing outside TV antenna system. Simply connect it in series with your local antenna lead-

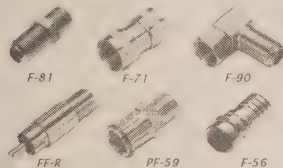

in and inject your satellite or VCR in on channel 3 (or 4, please specify). Out comes your local channels, plus satellite or VCR on channel 3 (or 4). Goodbye A/B switch!

## CABLE SPLITTERS

In order to add other TVs in the house to your satellite or VCR system, you naturally need to split the signals. 2-Way Splitter **\$1.29**, 3-Way Splitter **\$1.89**, 4-Way Splitter **\$2.39**, 8-Way Splitter **\$5.99**.

## CONNECTORS

F-81 Double Female **\$0.59**, F-71 Double Male **\$0.89**, F-90 Right Angle **\$1.02**, FF-R RCA to 'F' Female **\$0.99**, PF-59 Push-On Adapter **\$0.99**, F-56 'F' Connector **\$0.24**.

## HEX CRIMP KIT \$15

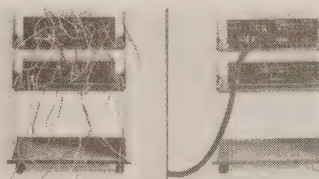

Extend your coax cables and make up your own custom-length jumpers with this

HEX crimp tool and 18 F-56 coax connectors.

## CABLE TIES 8¢ ea.

## CORD COVER \$7.50

1" x 4ft. Black Cord Cover eliminates unsightly cable mess.

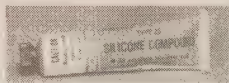

## SILICONE GREASE

**\$9.75**

Looks like vaseline but isn't.

U s e

Silicone Grease to weatherize outdoor electrical fittings & connectors. Won't melt or freeze, lasts for years.

## VHF/UHF/FM ANTENNA

**\$99**

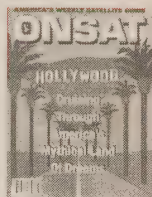

WINEGARD Chromstar 2000 fringe antenna has 68 active elements to deliver additional gain in weak signal areas. Measures 131L x 110W x 25.2"H. Other models available.

## ONSAT

**\$43/yr.**

Not just a weekly TV guide for satellite, but also a product reviews and industry information source. Save **OVER HALF OFF** the cover price.

## ORBIT

**\$52/yr.**

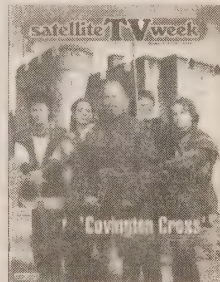

If you'd like to get your satellite programming information presented in a monthly format, then ORBIT is the guide for you. Incorporates handy pull-out satellite finder's chart and provides many pages of satellite related articles. Over half-off cover price.

## SATELLITE TV WEEK

**\$49/yr.**

This weekly guide is delivered to your home in an easy-to-read tabloid size. All channel listings are in your local time zone too. Save over half-off the cover price.

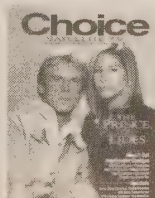

## CHOICE PPV

**GUIDE**

**18/yr.**

Monthly guide lists all the Pay-Per-View shows on satellite including the many adult programs.

**"Service Is Our Specialty" means FAST NBO Delivery.  
Call to order: 1-800-346-6466**

It's **no accident** that Pioneer's Audio/Video receivers have become "most in demand" for home theater designs worldwide. Professionals and hobbyists alike are demanding the high quality features offered in the new Pioneer line of *master control* units - the VSX series of Pioneer Audio/Video receivers. **AND NOW NBO BRINGS THE ENTIRE LINE TO YOU AT GREAT PRICES!** While only the most popular models are pictured here, we have them all available. So look over the features each one offers and find the one that provides you with enough to meet your needs. Be sure to consider all the inputs and outputs each has so you'll have plenty for satellite TV, VCRs, LaserDisc, Cassette Decks, etc. How many speakers will it need to power and how much output power will it take to do the job? Will you want on-screen displays or will the bright, clear front panel be enough? And several models employ DSP (Digital Signal Processor) for precise Pro-Logic steering and sound effects. Now you can have theater sound at home affordably when you view a movie on Satellite TV or VCR or LaserDisc. Many video tapes and discs of films made since the mid-1970s contain Dolby Surround information in the sound track and the Dolby Pro-Logic Surround incorporated in these receivers functions the same way the processors used by most first-run movie theaters do. First, sound is decoded by Dolby Pro-Logic, then it's polished by DSP sound field control to give you the feeling of being at the heart of the action. **Exclusively from Pioneer, Pro-Logic Theater mode envelopes you in sophisticated theater-style surround sound.** Call one of NBO's staff of technical experts toll-free for more information. 800-346-6466.

**NBO's CHOICE FOR QUALITY AND AFFORDABILITY** - For a GREAT feature-packed A/V Receiver with Dolby Pro-Logic Surround, go with the

VSX-511S with stereo power output of **100 watts per channel**, and surround power of **65 watts/channel** (front), **65 watts** (center) and **20 watts/channel** (rear). And, for Satellite TV or LD movies, an Accurate Imaging System automatically balances the power levels while incorporating acoustic memory. You also get a programmable Smart Remote with illuminated keys for easy control of all its major functions. Dimensions - 16-9/16 x 4-15/16 x 13-1/8" WHD

## Home Theater

**More Powerful Features For The Money!** The Pioneer VSX-D901S has 6 video and 5 audio inputs. A Non-Switching Amp™, Jog dial and Sub-woofer output are just some of the features that set this Dolby Pro-Logic Receiver apart from the rest. It's loaded! You get Split-Screen Video Enhancer, Digital Signal Processing with 5 sound fields as well as Digital tone control and one-touch recall of surround sound parameters. And the powerful output of **125 watts/channel**(front), **55 watts**(center) and **40 watts/channel**(rear) works for even larger room home theaters. And for expansion, it has preamp-out/power-amp-in terminals for front, rear & center.

**CD TRAY Inside LD TRAY!**

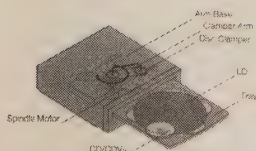

**BIG PERFORMANCE - SMALL PRICE!** It's the best value for your money. The CLD-S201 with 2-way loading plays video- AND CD-discs with a separate CD-ONLY tray. Some of the many features you'll enjoy are the Compu PGM & Auto Program Edit that automatically figures how many CD tracks will fit on a cassette tape; Last Memory for instant recall of last-played picture; Intro/HiLite scan which plays a few seconds of each track; and multi-speed forward and reverse. Dimensions - 16-9/16 x 4-13/16 x 15-3/8" WHD.

PIONEER'S CLD-D701 IS LASER ENTERTAINMENT AT ITS FINEST... and your opportunity to own the finest for less. Pioneer's top-of-the-line unit offers access to all available laser-read discs. Movie buffs will hail the crystal-clear picture quality and the perfect digital sound it delivers. And the new alpha-turn mechanism offers continuous two-sided play for a truly pleasurable LD movie experience. Other features include clean, noiseless high-speed or low-speed picture scanning & a 3-line Comb Filter for the best S-video output. It also has CD-deck Synchro, Last Picture Memory and more. Dimensions - 16-9/16 x 5-3/8 x 17-1/16" WHD.

**Best Picture In Town For Our Customers With Up To 425 Lines Of Resolution... Plus Digital Stereo Sound**

## LaserDisc Players FEATURE COMPARISONS

MultiPlay Mechanism holds up to five CDs or CDVs, plus a LaserDisc for non-stop entertainment.

With the CLD-S201, just push a button and the CD tray extends.

# COMPACT DISC PLAYERS

# JVC

Featuring a high-precision 3-beam laser pickup, and independent Suspension System, the XL-M507TN is created to let you savor the pure musical pleasure of digital sound. Yet its wide range of convenient features is simply extraordinary. To facilitate CD-to-tape recording, the two-way magazine

edit function offers "intro" mode: specify the recording time of tape (90 minutes for a C90 tape, for instance) on which the CD will be recorded, and program tracks while "intro play" samples the first 15 seconds of each track one by one. The computer lets you know when the tape is full, and you start the recording of the programmed tracks at a touch. The remote control for the XL-M507TN is equipped with a numeric keypad for direct track access. Also provided are an LCD display and a keyboard, offering some very special uses. For one, by using the keypad you can give titles to each of 120 discs. Using the stored titles as an index, you can find out which magazine you placed a disc in - a convenience when working with many discs and magazines. You can also list the titles of discs in magazines on the LCD display. The enhanced COMPU LINK Control System is yet another exciting feature. Especially useful is the function that automatically turns on the unit and a matched JVC receiver simply by loading a CD magazine, while the receiver's input is automatically set for CD playback. 6-Disc Magazine is included. Dimensions - 17-3/16 x 5-1/16 x 12-1/2" WHD.

# JVC

# DAT (Digital Audio Tape)

The DAT Deck model XD-Z507TN from JVC produces clean CD-quality audio recordings in a tape format that makes digital recording a technology everyone can use and enjoy. Operating in much the same way as the heads in a video cassette recorder, JVC's DAT "fine tracking" mechanism uses a head drum that's designed for superior tape running stability and microscopic mechanical precision. JVC has been a leading manufacturer of VCRs for years, permitting the

development of a superior design making it possible to record and play in the LP mode at half the normal speed for up to 240 minutes (R-120). This means the LP mode provides as wide a dynamic range and as high a signal-to-noise ratio as does the Standard-Play mode. But there's more to love about this incredible machine. The XD-Z507TN includes Auto ID edit. You can record "cues" on DAT at the beginning of a selection. Auto ID edit lets you relocate IDs during a post-recording editing session - a handy feature when adding a start ID for a piece of music that begins very softly. With it, a computer advises you precisely where you should put an ID, in steps of 0.25 seconds, for accurate cueing. Other features include one-bit A/D converter with 4th order noise shaping and 64-times oversampling distortion, 3-line inputs including optical and tons more.

## JVC 3-HEAD CASSETTE TAPE DECK FOR STUDIO QUALITY RECORDINGS.

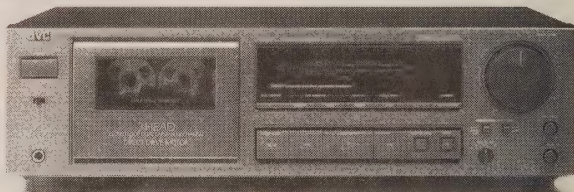

**For the Professional.**

Highly precise and accurate reproduction is the hallmark of the TD-V541TN, thanks to the combination 3-head design and closed-loop dual-capstan drive. The first ensures extended frequency response and low noise, while the second reduces modulation noise for clarity. The 3-head configuration also means you can monitor a recording as you actually make it! And with CD Direct input you bypass all circuitry and feed your CD signals directly to the record head for best quality. Other conveniences include music scan, headphone output, display on/off switch, gold-plated terminals and powered cassette lid. Dimensions - 17-1/4 X 5-1/4 X 13-1/8" WHD

## TOP QUALITY - On A Budget.

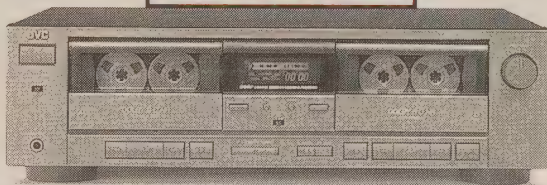

The TD-W207TN double cassette deck offers full logic control with Hi-Fi U-Turn Auto Reverse (deck B) for the best possible head-to-tape contact and frequency response... in either tape direction with the Flip Reverse Head feature. You'll enjoy the ability to play two tapes back-to-back with Relay Play for continuous music. And, for copying your tapes there's high-speed editing and synchro dubbing. Other features include Dolby HX-Pro circuit for improving high-frequency response during recording as well as Dolby B & C noise reduction systems, Auto/Synchro record mute, Fluorescent level meters and 4-digit counter, headphone output and more. Dimensions - 17-3/16 x 5-1/4 x 12-15/16" WHD.

## Here's a High-End machine

with features found only on more expensive models. For instance, it uses cassette-shell stabilizers and large insulators to reduce acoustic modulation caused by sound pressure from nearby high-level speaker outputs. And with its dual auto-reverse decks that play and record in both directions, you can even take advantage of simultaneous recording on two tapes! With relay play/record, you get continuous recording of up to three hours. It even offers variable pitch control which allows you to slow down or speed up your music... especially handy for use with the "mic input" when adding your own instrumental to a recording. Overall, the TD-W707TN represents a super value and tons of enjoyment. Dimensions: 17-3/16 x 5-1/4 x 12-15/16" WHD.

*Backed by the RCA name... a  
symbol of excellence.*

These state-of-the-art cordless rechargeable headphones truly enhance the quality and convenience of home entertainment. Now you can listen to interference-free signals from stereo equipment, broadcast TV, satellite TV, cable TV, videotapes and/or the radio for up to 5 hours on a single charge, without annoying cords. Privacy is enhanced, as well. One person can watch satellite or regular TV and enjoy clear hi-fi stereo sound without disturbing another person in the same room. Or, listen to your favorite radio station as you roam freely around the house and garden.

These headphones are extremely lightweight for superb comfort, and the handsome stand does double duty as signal transmitter and battery recharger.

Convenient controls allow volume adjustment and tuning directly from the headset.

## NEW! 8mm Portable!

### Don't Lose That Once-In-A-Lifetime Memory!

RCA PRO870 offers the incredible power of a 16:1 Zoom Plus™. Quick and easy! Zoom Plus goes beyond conventional camcorders to digitally extend the zoom range to 16:1. Plus... for special effects, special extended zoom mode provides even greater telephoto capability - up to 64:1. And for more opportunities to use your camcorder, the PRO870 uses Digital Signal Processing and the new high-sensitivity CCD image sensor for clear picture and natural color even in extremely low light conditions (1-Lux). The new Quick-Response Infrared AutoFocus system keeps objects in sharp focus even in low light or during pans and zooms and when used with RCA's other automatic features like Program AutoExposure that adjusts the shutter speed and iris, everyone in the family will be able to make perfect videos every time. The PRO870 also has professional editing capabilities with a Flying Erase Head for seamless scene transitions and Insert Edit which allows new audio and video to be easily inserted into existing scenes. There's also a 2-Page Titler, Video/Audio Fade Control Edit and Remote Control.

**In-Home Service For 5-Yrs. Available!**

Designed for easy interior placement and top performance, these Pioneer speaker systems use a single subwoofer for the low frequencies, and separate satellite and surround speakers for the mid and high frequencies. Without giving up any excitement or impact, their design lets you put the subwoofer under a couch or in a corner where it will be out of the way, and also keeps the satellite and surround speakers light and compact. These speakers are a snap to place, and will blend into the most stylish interior.

Each satellite and surround speaker measures a space-saving 6-3/4" x 10-3/8" x 4-3/4" D. Each satellite weighs a mere 4lbs.5oz. Walls, bookshelves, you name it, they'll fit. And their wide dispersion characteristics mean that they can be placed in a broad range of locations without compromising the sound.

The subwoofer measures 7-1/16" x 21-5/8" x 16-9/16" D and weighs 27lbs. Its non-directional frequency curve lets you hide it anywhere; under a sofa or in a corner.

For a modern, unobtrusive appearance, the satellites and surrounds come in white or black. The white is supplied with masking sheets so each speaker can be painted to suit your room decor.

If you want the full impact of movie-theater sound at home, this is the ultimate system for achieving extraordinary Dolby Pro-Logic surround sound. 3

front satellite speakers, 2 surround speakers, and one subwoofer make the S-V401 the top-of-the-line Dolby Pro-Logic Surround system. Great if you own or plan to own a Pioneer A/V receiver with the Accurate Imaging System, which equally distributes high-power output to the front, left, center and right channels. Precise sound effects, dialog localization, added depth and consistent sound quality over a large listening area are just some of the features of the S-V401 system. Satellite & surround speakers available in white (S-V401-H) or black (S-V401-K).

## Lifelike Home Theater Sound from Virtually Invisible speakers?

The answer is the Bose Acoustimass-7 Home Theater speaker system where you get lifelike, movie-sized sound from a Virtually Invisible speaker system. By choosing the Bose AM-7 for your home theater setup, you can make sure that only the soundtrack fills your room. With a pro-logic receiver, voices will come from center stage, as they should, special effects will approach you from the right and left, and the nuance of subtle sound will complete each scene, for a bigger-than-life effect.

The appeal of this speaker system lies in its Bose-patented Acoustimass speaker technology and Direct/Reflecting speaker design. That's why these speakers can re-create a natural balance of reflected and direct sound that conventional speakers cannot. It's also why size enables them to go visually unnoticed. Each Direct/Reflecting speaker cube array sends some sound to you directly, while the rest reflects off your side walls. And by rotating one cube, you can tailor this mid- and high-frequency pattern to your preference. Multi-directional bass from the hidden module fills out the surround effect. All of the sound seems to come from the small cube arrays, yet you feel surrounded by sound, just as you are at the movies. In fact, every seat becomes the best seat in the house.

Acoustimass-7 is compatible with receivers or amplifiers rated from 10 to 200 watts per channel, 4-8Ω. Cube arrays in black or white 6-3/8 x 3-1/8 x 4-3/4" HWD. Bass Module in black only 7-1/2 x 14 x 19" HWD.

## Sounds... so Clear and Lifelike.

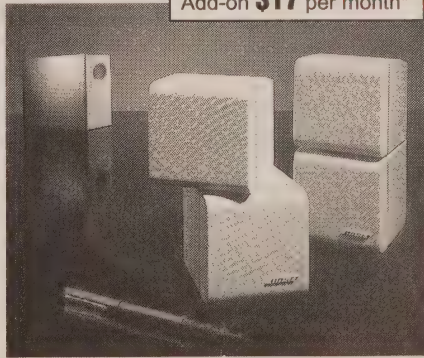

With the Bose Acoustimass-5 speaker system you'll enjoy performance previously approached only by much larger, more costly systems. Yet it's so small, you can appreciate its superb sound in any room you choose, without moving furniture or otherwise altering your decor. The secret is in the way Bose has designed this system. The patented Bose Acoustimass speaker technology minimizes the motion of the speaker cone which, combined with the acoustic filtering effect of the enclosure's design, eliminates audible distortion. And the Direct/Reflecting Cube Arrays are uniquely designed to radiate sound in a 3-dimensional or more life-like manner. By rotating the arrays, you can tailor the direction of the mid/high frequencies to cause a big room to sound more intimate, and small rooms, more spacious. Plus, you have the freedom to sit almost anywhere in the room and still hear the full stereo effect. Rated for 10-200 watts/channel 4-8Ω. Cube Arrays 6-3/8 x 3-1/8 x 4-3/4" HWD. Bass Module 7-1/2 x 14 x 19" HWD.

From local FM-Stereo to The Radio Netherlands and almost everything in between, SANGEAN World Band Radios give you more access to the world of information and entertainment. All the overseas shortwave stations, high frequency government channels, ham bands and more, including all regular AM Band stations in the U.S. are available with these radios. Great fun, and a wonderful education for the whole family! You'll hear English broadcasts from every country. It's your choice - just select the frequency from the guide (included) and key it in directly, or automatically scan the bands for these stations then save them in memory for recall any-time. Sangean models ATS808 AND ATS818CS receive all SW bands from 120m to 11m and continuous coverage from 150Khz to 29.999Khz with 45 memory presets, radio/buzzer clock alarm, sleep timer, 5-tuning modes with signal strength meter, FM stereo (via headphones) and more. ATS818CS receives single-side band and CW with RF gain and wide/narrow filter. It also includes a programmable cassette recorder with timer function! Sangean ATS818CS

**800MHz - Top-Of-The-Line!**

These days more than ever,  
you'll want a UNIDEN  
Scanner.

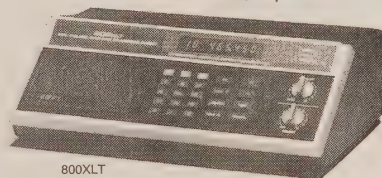

Model 800XLT - List \$349

NBO Discount **\$259**  
Low as \$7 per month\*

Because these days there's more happening on the radio bands than ever before, you'll want to stay informed. And Uniden scanners let you hear it all. Now you can monitor all the public communications such as police, fire departments, emergency services and many more, including commercial and military aircraft frequencies.

The 800XLT is the most sophisticated 800 MHz scanner available. The ultimate in base/mobile units has 40 programmable channels covering 12 bands from 29-912MHz. It includes 2-20 channel banks and instant weather search. Other features include priority lock out, and delay. Its patented track tuning with automatic and manual search make the 800XLT the only choice for the serious user.

The 200XLT sets a new standard for handheld scanners in performance and dependability. This full-featured unit has 200 programmable channels with 10 scanning bands and 12 bands of coverage, including aircraft and 800 MHz. It also includes weather search, 10 priority channels, squelch, lockout and delay. It features automatic and manual band search to find new active frequencies.

\* Monthly Add-On amount to existing NBO charge account with balance in excess of \$600. Minimum monthly payment of \$15 required on any account balance less than \$600.

HIGHWAY COMMUNICATIONS SYSTEM

# uniden®

**With  
Highway  
Patrol  
Warning  
Alert!**

BCT 2 - List \$269

NBO  
Discount

**\$199**

Add-on **\$5** per month\*

The Uniden BCT 2 is a must if you drive the interstates! This unit has the ability to alert the driver both audibly and visually to the presence of Highway Patrol units within a three mile radius... EVEN WHEN THEY ARE NOT USING RADAR! This is not a radar detector; it is a sophisticated multi-band pre-programmed mobile scanner/receiver that also responds to radio waves emitted from a special secondary transmitter which has recently been installed in most Highway Patrol vehicles.

Every state you select contains a unique set of priority frequencies within highway patrol's frequency list. When any one of these priority frequencies is transmitted, the BCT 2 responds with a warning alert consisting of a visual and audible alarm. The warning alarm sounds about 5 seconds for each transmission received and the warning lamp continues to flash until you are out of a 3 mile radius of the last transmission.

It's fully pre-programmed and includes a complete frequency list of Highway Patrol, Local Police, D.O.T. and all Weather channels. Just select the two letter abbreviation for the state you're in and the BCT 2 automatically starts scanning all the right channels, including the Highway Patrol frequencies stored for that state. Covers Low, High, UHF and UHF "T" public service bands.

**Protection** - Helps protect you against all forms of speed measurement including Radar, VASCAR, Airplane, Clocking and Laser.

**Accessories** - Includes DC cord, mobile mounting kit and antenna splitter to share your car radio antenna.

\* Monthly Add-On amount to existing NBO charge account with balance in excess of \$600. Minimum monthly payment of \$15 required on any account balance less than \$600.
